

2019 - 2020

CAIS Yearbook

Early Years & Primary

Agustin Onsari PYP Principal

"Education is not the learning of facts, but the training of the mind to think." - Albert Einstein

"The capacity to learn is a gift; The ability to learn is a skill; The willingness to learn is a choice." - Brian Herbert

This Yearbook is a celebration of who we are and the things we have achieved during this year as a community, through the commitment of students to do their best; the support of parents to make things happen, and guidance of staff to establish clear expectations in a challenging environment. We proudly share with you some samples of how students acquired knowledge, understood concepts, mastered skills, and took action. We feel proud because we can see they are getting ready to have a positive impact on the world. A world that is changing fast. A world where, in spite of all the changes, the essential inquiries to define our identity are still the same:

Who we are and who we want to be.

Where we are and where we want to be.

How we express ourselves and how we want to do it.

How we organize ourselves and how we want to do it.

How we share what we have with others and how we want to do it.

How things work.

Exploring these themes we better understand ourselves, other people, and the world around us. That will guide us to decide what is the best we can do for us, society and, nature.

Colin Attwood PYP Coordinator

This year has been unlike any year before it. Our first semester saw us enjoy a new International Day festival. Our assemblies were on Fridays and done by grade level. Many of our favourite events continued on, including Halloween, the Winter Festival Concert and Chinese New Year celebrations. We found ourselves mixing classes for specialist teacher lessons. Life looked much like it had in years past.

In late January, we left school for the Chinese New Year holiday. Then everything changed. We began to do our learning at home when the new semester started. It was new for all of us. We met with our teachers and classmates through Zoom and our teachers sent us videos and learning opportunities that we could do at home. We developed

our **independence**. We were asked to be **creative** in how we showed the learning we were doing. Sometimes we had to make models or machines out of materials we could find in our house. We learned to make videos and take pictures to send to our teachers. We were challenged to be **inquirers** by finding solutions to problems we haven't faced before. We had to be **balanced** and **principled** to know how much time to spend on our learning and when it was okay to do things just for fun. We were **reflective** about what school means and how much more it provides than just school work.

We are proud of how our students responded to the challenge that COVID-19 presented. While it has been a challenging year, it has been one filled with growth. Our students are more resilient than ever and have proven that they can succeed in the face of seemingly insurmountable challenges. We look forward to the future, not as a return to what was, but to what it will become.

10 Reasons

why the IB Primary Years Programme (PYP) is ideal for students to become active, lifelong learners

1 
It encourages students to inquire

The PYP fosters natural curiosity and learning in creative, supportive and collaborative environments.

2 
Understanding a complex and interdependent world

PYP students create meaning for themselves and build understanding through exploring real-world issues.

3 
PYP students are confident communicators

PYP students learn to communicate in a variety of ways and in more than one language.

4 
Learning how to learn

PYP students work collaboratively with teachers and other students to plan, present and assess their own learning.

5 
It encourages international-mindedness

Collaboration and understanding of their own and other cultures are an important focus of the PYP — students learn how to be respectful and open-minded.

6 
Seeing things from different perspectives

PYP students use critical and creative thinking to develop knowledge, understanding and skills within and across subject areas.

7 
Students take action

PYP students believe they are able to grow and succeed. They make appropriate choices and take responsibility for their actions.

8 
Thinking about issues

Creative learning gives students the agility and imagination to respond to new and unexpected challenges and opportunities in an increasingly globalized and uncertain world.

10 
Caring and responsible citizens

Students can express ideas and opinions, and they can propose solutions that make a difference in their lives and the lives of others.

9 
It involves the whole school learning community

Together we celebrate our common humanity and the belief that education can help to build a better and more peaceful world.

PRE K - K2

Miss Asni

PRE-K

Dear Pre K A,

It has been a memorable, yet challenging year for us. We learned so much together to be the best that we can be. There is so much to learn, from self-help skills, manners, language, number, alphabet, friendship, kindness and care towards one another. We also learned how to be an independent and a confident individual. At times, it was not always so easy, but we managed to try and give our very best. We wish you all the best in whatever you do. Stay curious and wonderful always!

Dear Class of 2019-2020

One of the most rewarding aspects of being a teacher has been watching you all grow over the course of the year. You all have blossomed into young scholars, and we are so proud of you all. Letters and sounds soon became words that invited you into the world of reading and writing, giving you strong voices to express yourselves. You grew as individuals too, exploring your independence and what it means to be a kind and caring student, classmate, and friends. As you venture off, we hope that you will take what you have learned. This year has come and gone so quickly I cannot believe the end is already here. I am so excited for your futures and I want nothing but the very best in the years to come. I know that each and every one of you will succeed in everything you put your mind to.

Remember to always work hard and never give up!

Love always,

Ms. Savanna, Ms. Hilda & Ms. Jenny

Dear class of 2019-2020,

We cannot believe it is already time for you to leave us and move on to K1. We have had a wonderful year together. We started off the year getting to know each other and making new friends. We had many enjoyable moments together in the classroom, reading stories, playing games, singing songs, creating art as we learned all about ourselves and the world around us. You have all risen to the challenges of online learning. While it is sad that we cannot play at school, you have many wonderful memories of spending extra time with your families. We will miss you and wish you all the best next year in K1.

K1 B

What a year this has been! We have spent the year exploring a wide variety of topics to help us in our education journey. We became more principled as we learned about rules and routines and how they are necessary in the organization of our home as well as school community. We became better communicators and discovered many ways that we are the same and different which helped us to become more open – minded and caring learners. Investigating healthy habits helped us to become more balanced. We thought about different ways that we can travel including ways that we have traveled and ways we would like to travel. We also became more knowledgeable about light and energy and how to best use our precious resources. From holidays to birthdays, we enjoyed a variety of celebrations.

Now we are ready to move on to new adventures in K2!

Class Activities

PRIMARY

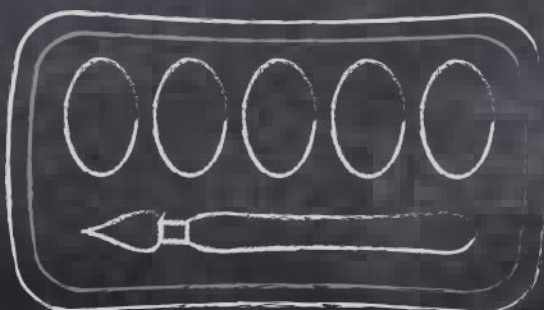

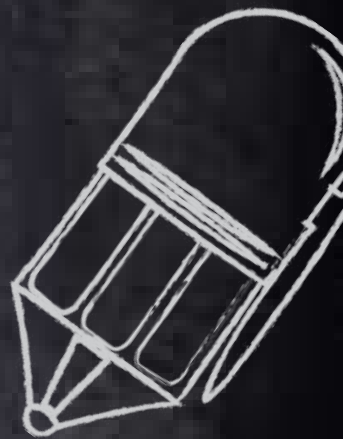

PYP 1 -

YEARS

- PYP 5

Mr Michael

This was a unique school year. We started the year in school inquiring into different types of rules, signs and symbols, and where food comes from. The PYP 1 assembly was a great success where you shared your learning with the community. Your hard work and performances are something we were all very proud of. After Chinese New Year, the school closed but the learning continued from home. Studying at home and having classes on Zoom is an experience that we will never forget. We inquired into healthy habits, how things have changed over time, and how we can use force and motion to solve problems. It was very challenging not being able to learn in the classroom but the you all rose to the challenges that we met and showed a great amount of growth through this difficult period. I am so proud of all of you and wish we could have spent more time together at school. I look forward to seeing all of you back at school next year and I wish you all the best in PYP 2.

Jeremy Boutin

What was your favourite activity to do at home when the school was closed because of the virus?

Andy Xu - I liked playing badminton with my mom, it was fun.

Kobe - I liked going to play with Andy Xu, because he is my friend and we had fun.

Lya - After my homework, I can play with my friends. We get to get ice cream together, it's yummy!

Charlotte - At home I used baking soda to make snow, I like it because snow is very soft and I like soft things.

Mirai - I drew a cat, I liked this because I have a cat and I really like cats.

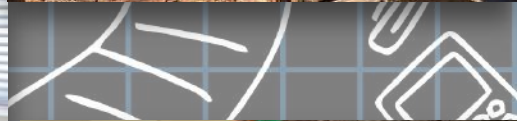

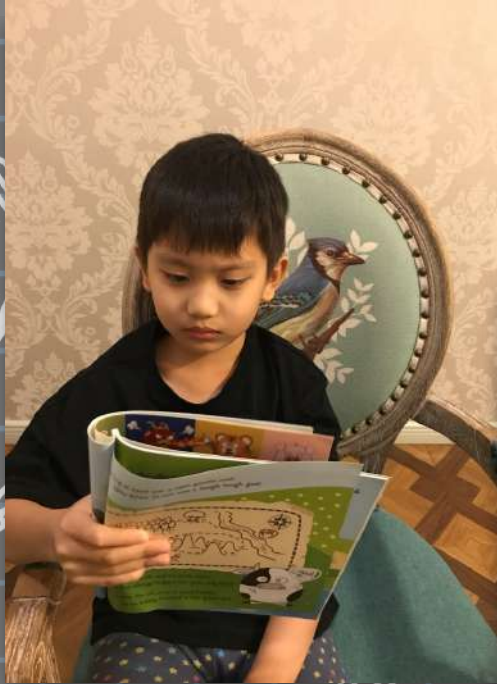

Jessie - At home I really liked dancing, because it keeps me busy.

Andy Jin - At home I like to read books, because it is very fun.

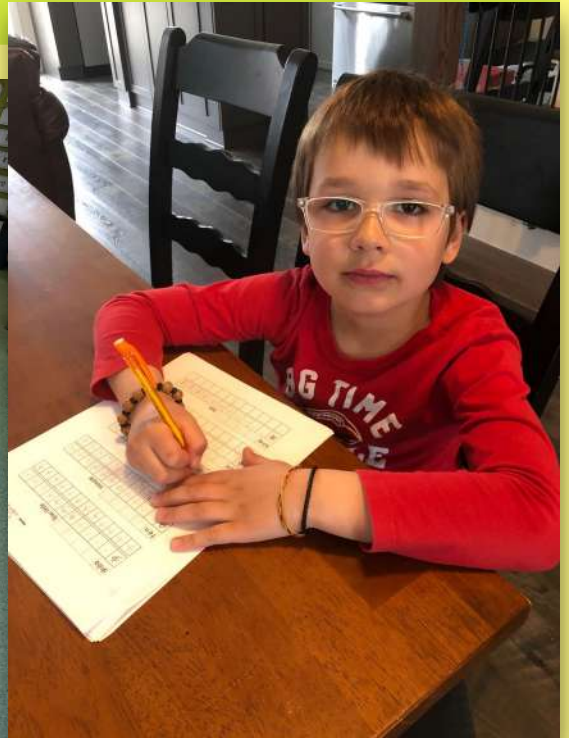

Daniel - I enjoyed building a playhouse every day with my Grandad in Ireland.

Jeremy - At home I can play with my legos more often.

Helen - I have enjoyed playing with my toys at home.

CLASS ACTIVITIES

Mr Mike

Hello PYP 1B!

Congratulations on completing your first year of elementary school. What an interesting year we have had. We spent the first semester in the classroom and the second semester learning from home. We celebrated Halloween and Chinese New Year together. We learned together, played together, laughed together, sometimes cried together, sang and danced together. Eating lunch together in the cafeteria was the time we could really chat, laugh and share jokes with each other. The boys tried to teach me Chinese, but still the only word I can say is aunty. The girls played the copying game by repeating everything I said. A special friend who helped us this year was Mojo from Class Dojo who taught us that mistakes are good because they help us to learn. Remember, you can do it, maybe just not yet! I want to say a big thank you to you all for always trying, always caring and always being you. It has been my absolute pleasure to learn and grow with you all this year. All the best for grade 2!

What was your favourite activity to do at home when the school was closed because of the virus?

Enzo - I enjoyed doing my work.

Isabella - I enjoyed drawing.

Kevin - I enjoyed art class and exercising.

Martin - I enjoyed drawing and learning.

Momoka - I enjoyed having a picnic and drawing.

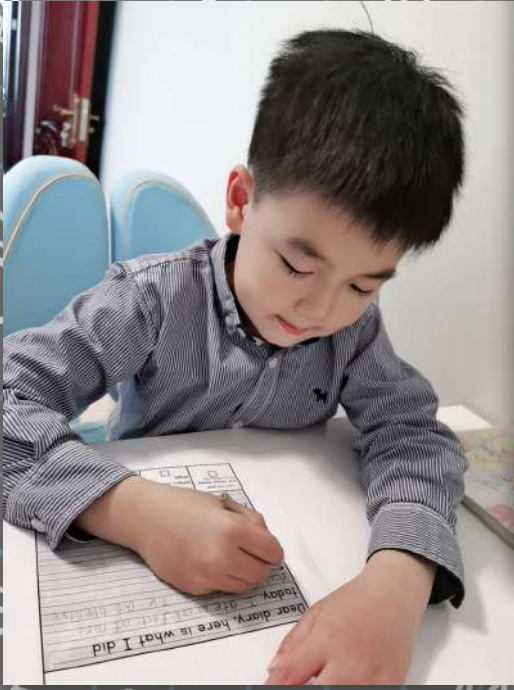

Nina Ning - I enjoyed dancing with my grandma at home and drawing.

Nina Zhang - I enjoyed jump roping, because it makes us taller.

Zakiya - I enjoyed drawing and making crafts.

Andre - I like ride on my bicycle because it's very fast.

Andy - I enjoyed picking fruit.

CLASS ACTIVITIES

Miss Maria

Welcome to PYP 2 A 2019/2020.

From the beginning of the school year, we have been sharing a lot of moments together. Every day, we had stories to tell, laughter to share and challenges to overcome. We are all different but we keep trying to work together.

This year, the Corona Virus outbreak had created different learning opportunities for each of us. We had to move our classroom to a virtual space for the second semester. Never occurred in our mind when we said happy holidays before the Chinese New Year break, that it would be the last day we saw some of our friends this year. It was not easy, but it became a story to tell.

Everything that has happened will be part of our stories. We will treasure the memories and keep on learning to be the best version of ourselves.

What was your favourite activity to do at home when the school was closed because of the virus?

Wendy - My favourite activity was making my 3D model.

Zison - I enjoyed baking with my mom and sister.

Rachel - I enjoyed reading my books.

Frank - I enjoyed playing games on my iPad.

Isabel - I enjoyed learning about math.

Elisa - My favourite activity was making my 3D model.

Jordynn - I enjoyed doing my science experiment.

Etain - I enjoyed the island activity the most.

Markus - I enjoyed the zoom sessions, they were fun.

Johnny - I enjoyed driving a go-cart.

Martin - I enjoyed playing with my Lego.

CLASS ACTIVITIES

Mr Mark

The school year 2019-20 will always be remembered as the year of the Corona Virus. It was a challenging year for our students because our happy routine of learning and socializing with friends at school was displaced with being at home to venture into the world of home learning. Through these challenging times, the students in PYP2 B used the necessary skills and resources available to become responsible learners. When we talked about conflict, we came up with ways to solve problems or help our emotions as we were isolated in our houses. When we talked about exploring, we opened our minds to each other and found new ways of using our creativity to do our learning at home. Often times in the world we must face challenges in order to see who we are as people or to understand ourselves a little more. This is important in order for individuals to reach the best version of themselves. This year, the PYP2 B class should be extremely proud of the way they handled this challenge. It is important for them to remember this time and reflect on how much they have grown as learners, problem solvers and friends to each other.

What was your favourite activity to do at home when the school was closed because of the virus?

Alex – I liked being able to create my own portfolio.

Anna - I liked listening to music and playing with my brother.

Alyssa - I like submitting my schoolwork using Toddle.

Bella - My favourite activity was staying in bed to sleep a little longer.

Hong - I liked playing with Lego's and building things.

Julie - My favourite activity was playing because classes were shorter.

Valentin - My favourite activity was doing my homework and playing with my sister.

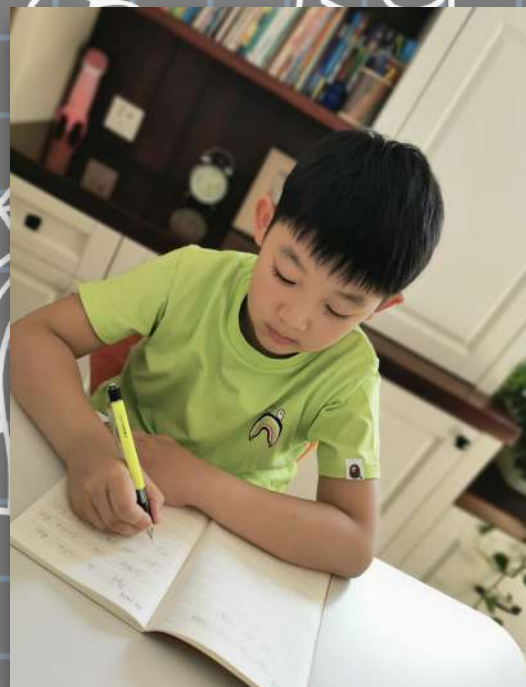

Hazel - I enjoyed doing the land forms project.

Sun - My favourite activity was riding my bike and doing kung fu.

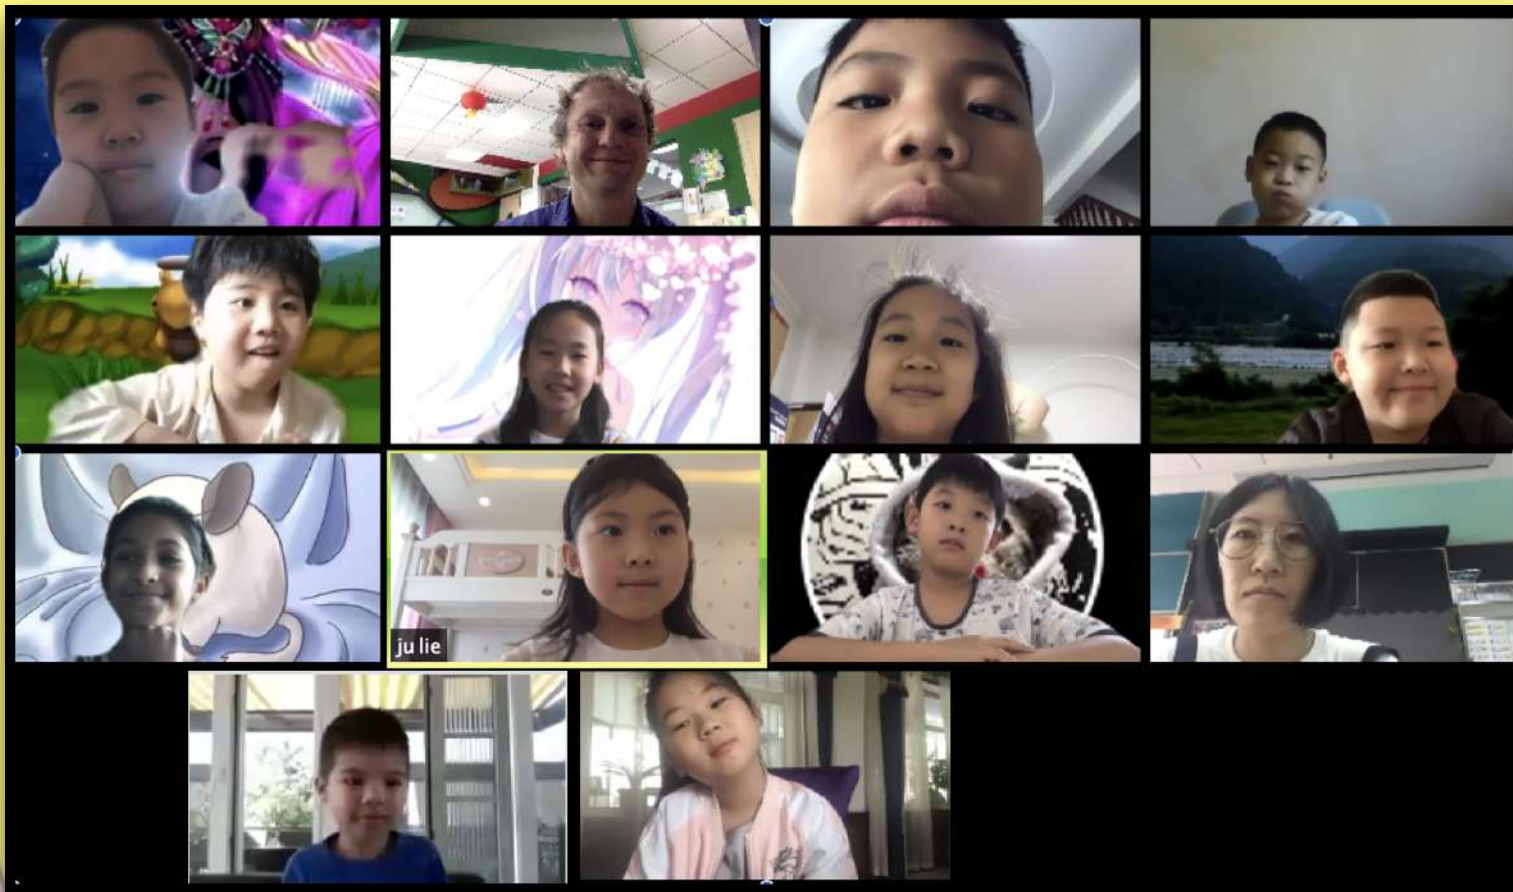

Xuan - My favourite activity was playing chess at home.

William - I liked getting up each day and not having to eat food at school.

Xylia - I like drawing at home and playing.

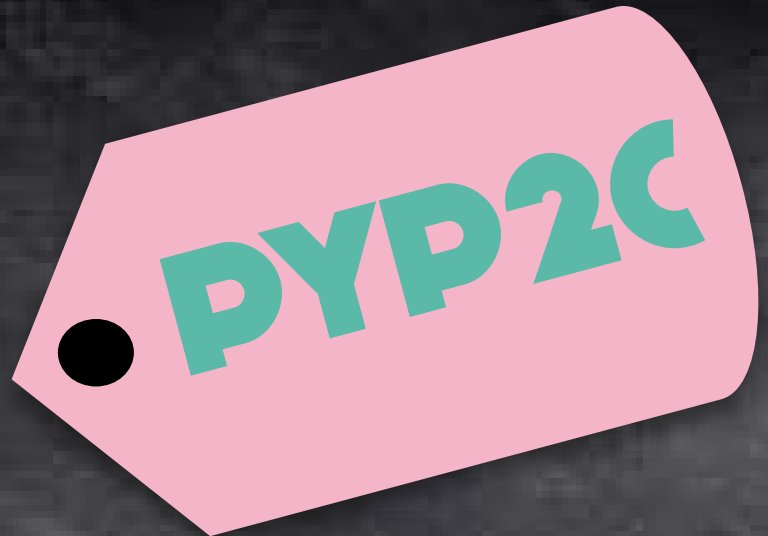

CLASS ACTIVITIES

Miss Magda

The school year of 2019 – 2020 started off in a normal way. Getting to know each other, learning and enjoying our time at school. But then disaster struck. We were all confined to our homes by the COVID-19 pandemic.

Learning had to commence in front of a computer. This was hard for everyone, but we all tried to do our best. I really missed the class noises and my student's physical presence. They also kept on asking when they will be able to return to school. But as a teacher I am super proud of my students for what they have achieved during this time. You were an amazing PYP 2 C class! You can be proud of yourselves!

Kim, Doyul

Zhang, Bo Ran
(Peter)

What was your favourite activity to do at home when the school was closed because of the virus?

Amy J - I enjoyed planting avocados in the garden and playing with my sister.

Amy G - I enjoyed drawing, because it was fun and I could draw anything I wanted to using my imagination.

Mustafa - I enjoyed playing soccer, because it was fun to kick a ball instead of sitting and doing nothing.

Marcello - I like building things with my Lego, because it made my imagination grow.

Michael - I liked playing with my iPad, because it was fun.

Doyul - I enjoyed golfing with my dad, because it was fun to spend time with him instead of sitting in the house.

Allan - I enjoyed sleeping, because i like to sleep and relax.

Linda - I liked to play with my neighbors, because we had fun and we made good memories together.

Dora - I enjoyed cooking, because I enjoy eating food.

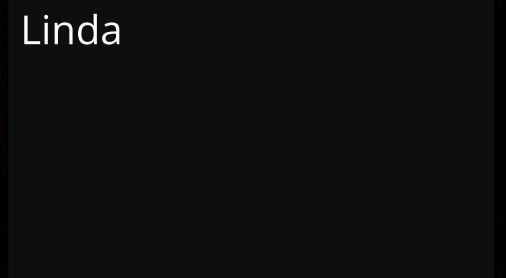

Peter - I liked to play with my brother, because then I was not alone.

Serena - I liked to walk my dogs with my brother in our yard, because it was fun and we could play while walking them.

Sophie - I enjoyed sitting in my room, looking at books and drinking tea, because it made me feel relaxed and gave me more knowledge.

CLASS ACTIVITIES

Mr Joe

PYP 4A's year was an amazing journey of discovery. For the first part of the year we inquired about the human body systems and what makes us tick. We looked at the lives of immigrants and explored the world through their eyes. We used our imaginations to create advertisements that would appeal to consumers. After our winter break, COVID-19 hit and things became a little different. We continued to learn but from home and using Zoom. We created products that would entice people and learned about the environment and different resources. All that we learned this year we will carry forward in the next grade. We have all grown as inquirers this year and I look forward to watching their continued successes.

Boyle

Xu, Zhuo Fan
(Koey)

Zhu, Wen Zhong
(Evan)

Huang, Hao Feng
(Frank)

Deng, Xiao Hu
(Tiger)

Seraphine Sophie
Kharismana

Zhang, Tian
Meng (Vivian)

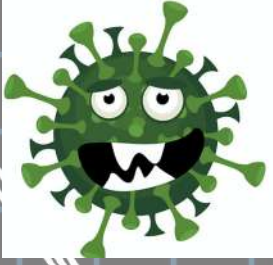

Liu, Huan Yu
(Matt)

Liu, Yan Xu
(Leroy)

Zhang, Si Ran
(Shimon)

What was your favourite activity to do at home when the school was closed because of the virus?

Evan - When I was told that I couldn't go out because of the virus, I was worried and sad. My school also was closed because of COVID-19. I can't see my teacher and classmates. After a month of staying at home, the virus was still there! So, we started our zoom meetings. It was somewhat school. We could learn many things in our online class, such as finding missing numbers, fractions, division, weathering, erosion and many other things. In my home I read and play, it was fun but I want the virus to go away so I can go back to my school.

Emily - In the time of covid-19 I can't go out to play. I can play in my garden. I need to have class on my iPad but it is ok for me in this time. I cannot have a nice class because of the COVID-19 but I have a happy time.

Leroy - The new corona virus also has an effect on me. The effect is that schools are closed and now I only study at home. The school and home are not the same, if I am in the school and have a question I will ask the teacher and they will give me an accurate answer but I am in the home and my mom or dad will give me an answer but it might be right or wrong. I want to go back to school.

Stella - In the corona virus I can't go to school, so I have online classes. The app is called zoom. There are a lot of classes art, music and I learn so many things. At home I can write in my journal and do my work. Sometimes we have very fun classes. I think online classes and learning in school is very different. I hope I can go to school.

Sophie - In February, me and my family had to stay home because of the corona virus. I was sad because I didn't get to meet my friends. I did the work that my teachers sent me. We had zoom together. I was so happy when I saw my friends. I can't wait to go back to school.

Sakura - At first I felt worried that I cannot go to school. But, when I went to my home country, I had wonderful a experience. One was that I grew plants and I felt enjoyment from the plant's I harvested. Next, was my parents bought books for me (English and Japanese). I read it during this period.

Vivian - At home I can read anytime. When I am at home I write my homework. I do my math work. I go online to do my classes. I still do my homework at home.

Matt - When I got the message of the COVID-19, I was scared that I was infected. The school said we needed to home quarantine to make ourselves safe. We have the online class and I think the class is very good and everyday have the online class. I think there is a big gap between actual teaching and the online class, but if I go back to the school I will study hard. the last thing I want to say is I want everyone to be safe.

Aoife - When I am stuck in quarantine it looks hard but it's not really that hard. We just stayed at home and watched tv, played and did schoolwork and we didn't have to wake up so early. We can sleep as long as we like. The hard bit is that you have to plan your school day by yourself and sometimes you just want to play but you have to do work and you could get easily distracted. But now that we are in the middle of quarantine you can go outside again but only with a mask and we still can't go to school yet. We also do online zoom sessions. There are good and bad bits in quarantine but I still want to go to school again just without waking up so early.

Si Ran - In the new coronavirus, we study in home. It is a long time that we use online meeting (zoom meeting). I am so sad when The school said: you can't go to school. The new coronavirus is so bad, but we can't find a way to kill new coronavirus. Some time you will think Zoom is good. And just because new coronavirus, teacher need to find the "student code" for toddle app. because we need send things in toddle app. I want go to school!! I miss my friend!!

Class Activities

Mr Mathew

Over the course of the 2019-2020 school year, PYP4 B has had an eventful time. From cooking lessons and learning about healthy living to our exploration of ethnic Russian culture in Harbin to our refugee simulation and culminating with working together to find ways to learn during the COVID-19 Crisis. During our year together, the students have demonstrated a level of resilience unexpected of their age and have managed to overcome the challenges of completing three units of inquiry online while still maintaining their commitment to their learning. It has been my pleasure to have been these students' homeroom teacher. I can safely expect them all do make themselves proud in PYP 5.

Kimberly Christin
Klemm

What was your favourite activity to do at home when the school was closed because of the virus?

Chelsea - My favourite activity is to have zoom sessions, because I enjoyed the time with my teachers and classmates.

Melina - I like the time when we separated into groups and had to guess where we were, it felt like we were in a class.

Jeremy - The favourite thing I like to do is to play with my brother, because I think it is fun.

Tiger - I like playing soccer, because we have enough space in the parking lot not far from my home, we have many balls and I like playing soccer.

Kavya - My favourite activity to do at home is to do different experiments and hacks to see if they really work like they show on YouTube. Sometimes I try my own experiments.

ONLINE LEARNING

Miss Tantri

It's been a challenging yet rewarding school year!

We started the school year inquiring into body systems and how they work. It was an exciting inquiry learning! We did a lot of fun activities, such as some scientific experiments to find out more about how our body system works. We also went to Harbin for a field trip to experience migration and find out more about migration. We cooked a lot of delicious food at our school kitchen to learn more about our focused unit of inquiry.

Due to the school closure, we needed to learn online through Zoom and Toddle. We showed our resilience and open-mindedness during the lockdown. We did our best to learn at home and made use of things around us as learning resources. We had done a lot of cool projects that were related to our focused unit of inquiry. We showed creative thinking skills when designing our own products. We also created our own business plan when inquiring more about economy.

We are ready to embark on our new adventure in PYP 5! With the skills and knowledge that we have learned in PYP 4, we are excited to grow as learners to be caring and balanced students who always strive to do our best!

When we are thinking back over these days when we could overcome all the challenges, we will be so proud of ourselves for our perseverance and resilience. Keep doing your best in everything you do!

From PYP 4C to all of you

(Ethan)

Zhao, Tian Hui
(Aline)

What was your favourite activity to do at home when the school was closed because of the virus?

Kezia - My favorite activity is playing with my sister. We made music together and use anything around us as music instruments. I also enjoyed when making some arts together with my family.

Kevin - I liked to play badminton at home with my sister. Also, I played tag game with my uncle. It was very fun!

Aline - I liked to play with Kely, my cat. Kely liked to catch balls and he liked to sleep.

Summer - I liked to play Minecraft in my phone because I used my thinking skills to play the game.

Mina - I liked to play with my cat.

Ethan- I played games, read books and did my school assignments.

Elza - I liked to play piano, read my favorite books and also draw. I also enjoyed writing and illustrating my story books.

Noah - I liked to play with my cousin and brothers. We play catch. I also liked to help my mom to make cakes or cookies.

Alex - I liked to play in my garden. I played basketball and football with my dad and sister.

Tian - Tian - I liked to play with my brother in our backyard. We built a snow slide. It was very fun.

Jack I liked to play LEGO. I built some houses or sometimes I used the small pieces to make a LEGO man. I also liked to eat and cook with my Grandma and Grandpa. I like to eat BBQ so much.

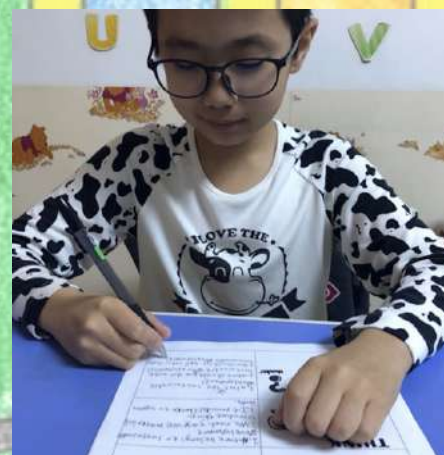

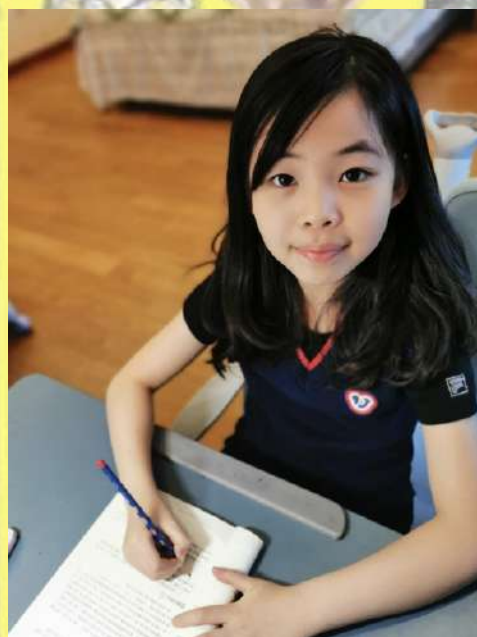

Max - During the quarantine, I needed to wear masks during playing outside. When things get better, I liked to play soccer with Samuel, Simon, Jason, Tobbe and Kim because it was so fun. I also liked to play on a trampoline with all my friends and also play catch.

Paula - I liked to draw with my hand and on the iPad, to listen to music and have a video call with my friends.

Jenny - I liked to read book. I liked to read a lot of books; a book about virus, animals and plants and many others. I also liked to play with Lucky, my husky dog. We played catch the ball.

CLASS ACTIVITIES

Miss Carolyn

What an unusual year, but PYP 5A students were troopers. They were committed all year, even while at home, to their learning and development as internationally minded students. They all worked well together even though they were separated by not only isolation but by oceans and continents too. PYP 5A students worked both individually and as a group to accomplish wonderful things, such as putting together a great Halloween display of carved pumpkins for PYP to enjoy, to their amazing Exhibition projects. I am incredibly proud of the PYP 5A students and wish them the best of luck next year as they start MYP.

Yu, Zi Chen
(Vivian)

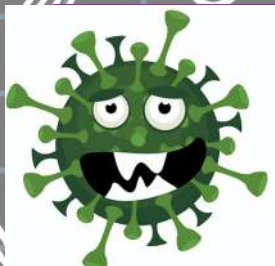

Zhang, Hyoun
(Esther)

Qiao, Guan Yuan
(Thomas)

Evie Marie
Schmidt

What was your favourite activity to do at home when the school was closed because of the virus?

Ella - I stay in home now, but I have fun in home, like drawing or reading. It is very fun for me. When I finish doing my homework, I will do it.

Dominik - I liked doing school in home because first, I have more free time. Second, I can eat whatever I want. I enjoy being home.

Kim- I enjoyed the PE class. I enjoyed Ms. Carolyn's class and Mr. Istvan's class. I was enjoying so many classes this year.

Maliya - I like doing class in home because after our live lesson we could rest and we could eat some food or fruits. When we finish class, we could go out and play for some hours, then go home and write homework.

Mini - During the epidemic, my favorite thing to do was to ride a bicycle and go to the playground in my neighborhood every night.

Thomas - I am very happy during this virus. I still learned a lot, and had fun. I watched the news every morning and knew a lot of things. I played Lego, and I was very happy.

Phillip - Hi! My name is Phillip Jessa. This year has been quite challenging for me. I am currently in Germany with my mom, my brother and my little sister. The good thing about the Covid19 period is that I could spend time with my grandma and my family here. The hard thing is that I am not able to see my father for months and I really miss him.

Tobbe - What I have enjoyed during the Covid 19 time is that I now have the time for things, that I normally can't do. One example is that I now have time to build my Lego technical car. That is why I enjoyed the time.

Candy - I enjoy working at home because I can have a chance to learn a new website and can have more time to stay with me little sister!

Zi Rui - I think this time is not fun because we can stay home, but we cannot play outside. We just can stay in the home and play some video games, sleep, learn. I want to be in school. When we are in school, we want to be on holiday. When we are stuck at home, we want to be in school. It is very difficult.

Esther - I actually enjoyed the countless hours of free time, and more place to go that I never went before and have more time to try new things. I actually met more friends and play with them outside than before. (But still less than the friends that I meet for billions of times in school.)

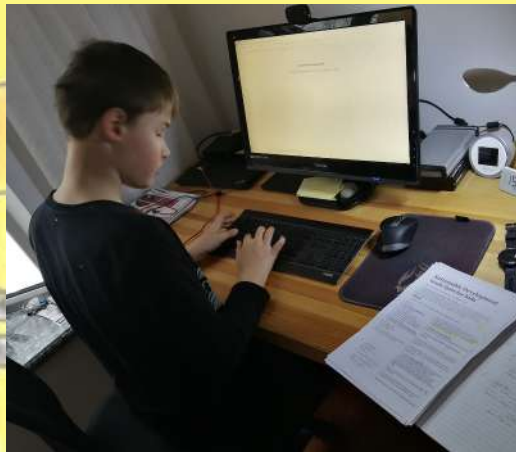

Yes, of course the more free time there is, the more bored I get. I agree that I miss everyone and I hope that one day the school reopens. Until that day, I'm bored. When that day comes, I think I will glee and squeal for a long time.

Sofia - I enjoyed the time with my family. I also liked the time when my mom was helping me with my school work. I also found some new friends. And I also lost some friends, but that doesn't matter because we have to be positive and brave.

Vivian - During the learning at home time, the sport that I like most is cycling. It is so fun and I can ride bikes with my friends happily.

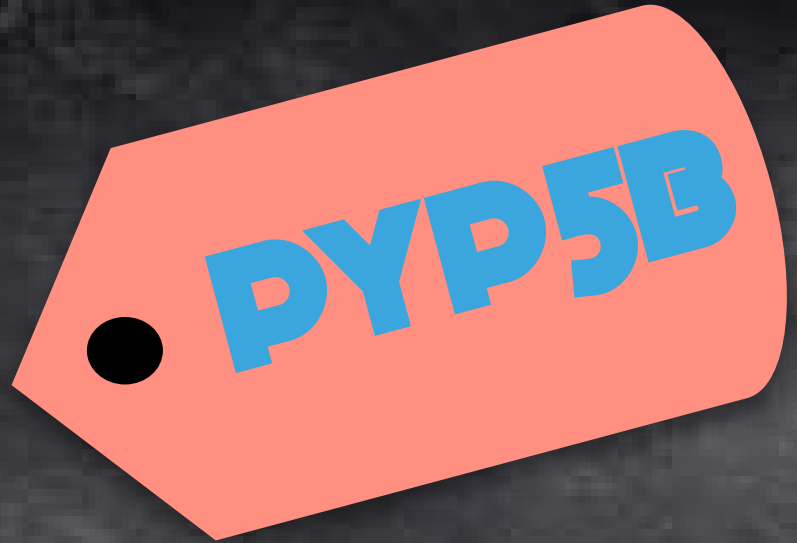

CLASS ACTIVITIES

Mr Mark

What a strange academic year: almost indescribable, but definitely memorable. None of you will forget the year that a global pandemic kept you at home and changed your daily life, the way you learn and the way you interact with others. Despite the challenges, and in some cases, because of these challenges, you better learned about the world you share with others, how it is organized and how it works. You had chances to express yourself and your conception of where you are in place and time, and most importantly, you learned who you are and who you can become. Good luck as you forge ahead into new learning and new experiences.

ONLINE LEARNING

Class Activities

Mr Jason

It has been a very interesting year for all of us in PYP 5C. We have struggled together, learned together, and grown together. Despite some of the obstacles that were beyond our control this year, we have inspired each other to become our best versions. We are very proud of the progress that we have made both individually and collectively.

I am very thankful to have had the opportunity to get to know and learn with so many wonderful students. I know that they will achieve great things, and the future is bright for the students of PYP 5C.

Wei, Qi Tong
(Alma)

Wang, Mi Qi
(Minnie)

Li, Yue Qi
(Yuki)

Kong, Zi Meng
(Lucy)

Joo, Jaeyoung
(Jenny)

An, Zheng Hao
(Andy)

Lukas Zhi
Lindner

Kim, Ho Yeong
(Joshua)

David Koormann

Wu, Xi Er
(Cynthia)

Wang, Ya Han
(Michelle)

Ma, Ming Hong
(Mark)

Richard Kovarik

Zhang, Jia Yi
(Jim)

Zou, Hao Lin
(Jim)

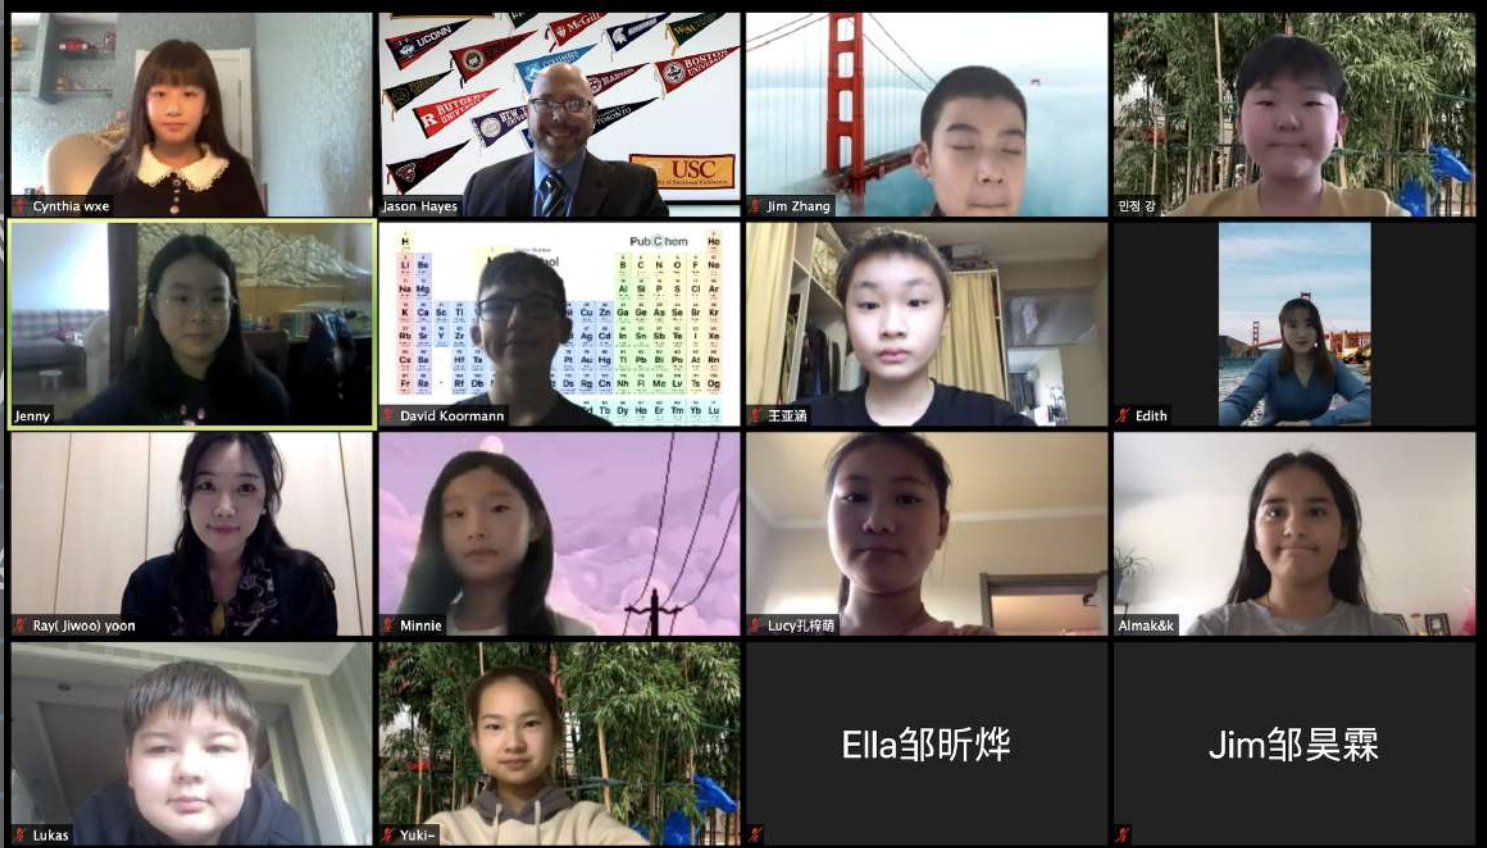

What was your favourite activity to do at home when the school was closed because of the virus?

Lucy - Not all the things is that there are somethings is good. Example the bad way: I will become fat. Because in epidemic situation we cannot go outside, and when we finish eating dinner breakfast or lunch we cannot go outside for a walk. So we can become fat. Example the good way: It is also has a good way that is we have more time to sleep, because one we need to go to school to learn I just wake up in 6:40, but now I can just wake up in 12:40. That's good for me because I think I wake up in 6:40 I will be sleepy and feels bad.

Jim - Everything has two sides, good and bad, just like epidemic, it also has good and bad. The bad thing is we couldn't meet our family and friends. For example, we couldn't visit the old man in our family and we couldn't go school to Learning. However, there was a good thing. I had more time for studying and doing something I like. For example, I was able to read more books, and draw more pictures. Therefore, the virus was not all that bad.

Lucas - I think it is good in this coronavirus I have more time to play to learn and to do my thing. I think what is not good is cannot really play with friend and it is also the first time I have use email.

Joshua - In my opinion the virus is not all good and not all bad. The reason that it is not all bad is because we got to do some things we did not get to do while we went to school. For example, I got more time to play with my family, and I got to learn new skills. The reason that it is not all good is because we can only stay home. For example, we can't get to meet our friends, and we cannot go anywhere that is crowded. Therefor I think that the virus is equal.

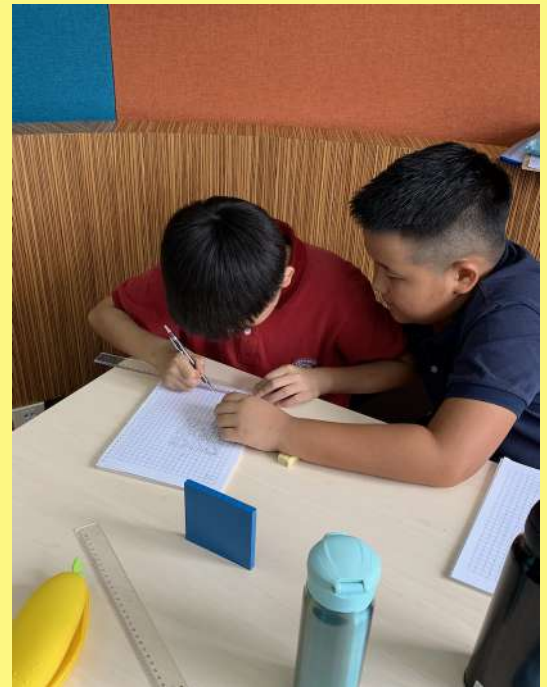

David - The whole outbreak is like a coin with two sides. One is positive and the other one is negative. At moment the most look at the obvious negative side but we can turn the coin around and look at the positive side for example the quarantine was negative because we couldn't go out and positive because we made sure we don't get sick, have more time with our family, do not produce as much CO₂ because no cars or planes are traveling and the animals can slowly get back to their habitats.

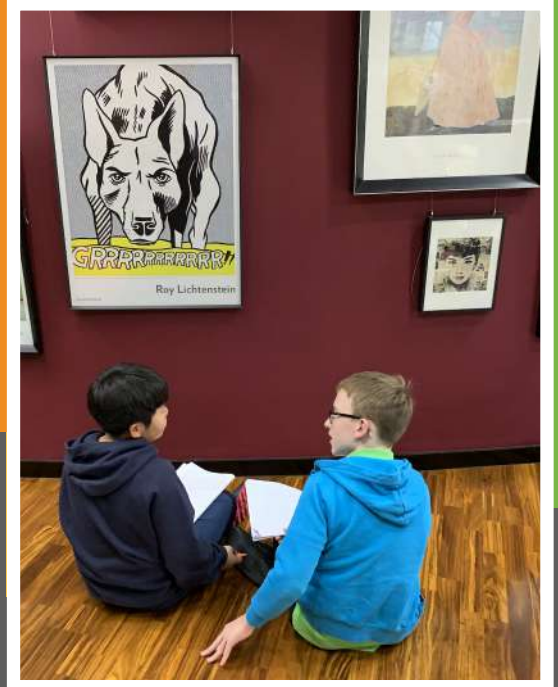

CLASS ACTIVITIES

PYP EXHIBITION IN

A DIFFERENT WAY

GERMAN CLASSES

In German class, we did many interesting activities this school year. From making fruit skewers in PYP 1 to building bridges with only paper and glue in PYP 5, all year groups had their own challenges to face and were given their own opportunities to learn exciting things about Germany and the German language. While working online for a large part of the year was a challenge at first, we all adapted quickly and found ways to keep things interesting, for example by playing PowerPoint Karaoke (look it up, it's really fun!) in our Zoom sessions.

In Deutsch haben wir dieses Jahr wieder viele spannende Dinge erlebt, ob nun Obstspieße in PYP 1 oder Brücken nur aus Papier und Kleber bauen in PYP 5. Dabei hatte jede Jahrgangsstufe ihre eigenen Probleme zu lösen und bekam eigene Gelegenheiten, interessante Dinge über Deutschland und die deutsche Sprache zu lernen. Auch wenn es anfänglich ein bisschen gewöhnungsbedürftig war, einen Großteil des Jahres online zu arbeiten, haben wir uns schnell daran gewöhnt. Wir haben viele Wege gefunden, den Unterricht interessant zu gestalten, zum Beispiel mit PowerPoint-Karaoke (schlagt es nach, das macht echt Spaß!) in unseren Zoom-Sessions.

Chinese A and B

Dear children:

A yearbook, a memory.

"Learning in an epidemic situation" might be our most special experience in the 2019-2020 school year. The time we haven't spent together has been a memorable one. We are very unfortunate to have had to live through an epidemic. However, we are also lucky. We can all use this time to reflect and learn to respect nature, abide by the laws of nature, and live in harmony with nature.

Those of you who are working hard are even more aware of the importance of self-management while studying at home. This time will make you special and you will grow into most beautiful flowers in the world. The teachers are willing to continue to be the paving stones under your feet so that you may achieve your aspirations of becoming the person that you wish to be.

PYP Chinese Teachers

Summer, 2020

亲爱的孩子们：

一本年册，一份回忆。

在2019-2020学年的“疫情中学习”，是我们最特别的经历，这份经历足以让你们刻骨铭心。遇上疫情是人类的不幸。然而，我们也是幸运的，人类在疫情中反思，学会了敬畏自然，遵守自然法则，与自然和谐相处之道。

努力的你们更是在居家学习中，懂得了自我管理的重要性。你们是独一无二的，将成为世界上最美丽的花朵。老师们甘愿继续做你脚下的铺路石，成就你们“欲穷千里目，更上一层楼”的壮志。

孩子们，“海阔凭鱼跃，天高任鸟飞”。腾飞吧，“莫愁前路无知己，天下谁人不识君”。

PYP LIBRARY

Our Library is an important and fundamental part of the teaching-learning process. We offer different types of printed and online materials to support the development of the IB curriculum.

We place emphasis on research skills, academic honesty, and preparing our students to be active, independent and responsible users of information. Our main objective is to inspire students to discover their passion for reading.

In these special times, librarians work hard to bring the Library closer to our children's homes and continue supporting the learning process, so that they can continue enjoying all of the wonderful stories.

Miss Stevie

Miss Trish

MUSIC AND MOVEMENT

Dear all,

I am very grateful to meet the students at CAIS, and I'm very pleased that students like to use body movements to express themselves. They understand who we are through movement. They know how to maintain practice and self-management to achieve better dance performance. They can show their dance wherever and whenever they are. They always try their best version to show the audience. I hope that CAIS students will find enjoyment and appreciation in music and rhythm, and find it beneficial in their life and in the future. Boys and girls, see you next year.

Maggie Chen

M U S I C

Mr Istvan

Miss Elizabeth
(Early Years)

Dear students,

It was great to have you in my class this year seeing you grow with your musical skills. Thank you for working hard even during these extraordinary circumstances. I would like to encourage all of you with this quote: 'Staying positive doesn't mean you have to be happy all the time. It means that even on hard days you know that there are better ones coming.'

The music be with you all,

Mr. Istvan

P E

Mr Henry

Mr Edward

Mr Marty

Dear PYP students,

Sports can broaden our horizon, expand our scope of knowledge and enrich our spiritual civilization. All sport training can stimulate one's interest and tap into one's potential and make you stronger. Of all the ingredients of success, sports seems to be the first within our control. Sports help you in the important process of building interpersonal relationships.

Mr Edward

ART

Miss Halina

Miss Erica

Visual arts as a discipline includes the development of creative skills, verbal and non-verbal expression, an awareness of the perspectives of others and aesthetic appreciation. Visual arts enable students to communicate in powerful ways that go beyond their spoken language ability. Through visual arts, students can begin to construct an understanding of their community, their environment, their own feelings and emotions and to develop their cultural awareness.

2020 has been a challenging year, especially for students all over the world. During the COVID-19 pandemic, we provide opportunities for students to explore home environment, stimulate and challenge them during their creative process. Students were also encouraged to use daily life objects such as food, kitchen tools and recycling supplies to accomplish their weekly art tasks. Visual arts distance learning stays connected to the Units of Inquiry with flexible activities, tools and materials. This not only makes the whole learning experience more authentic but also enables students to collaborate with their families and friends. With their great support, it gives all of us more opportunities to create stronger relationships within our CAIS community.

Student Council

This year was the first year of the PYP Student Council. The Council met several times before the Christmas holiday. We discussed what it meant to be in the student council and ways that we could make indoor lunch times better for the students. Unfortunately we didn't have a chance to meet again after Chinese new year.

Student council was good. I enjoyed telling the others in my class about the things we talked about. - Mirai

I really enjoyed being on the Student Council. If I am on the Student Council again, I would like to teach the students about snack time. Many students bring candy and cakes but I think fruits and vegetables are better. - Isabella

I enjoyed taking responsibility, there is a lot of responsibility being in the student council but I enjoy it. We have some kind of problems with girls and boys, we have conflicts and if I'm in student council again next year I will try and think of ways to solve this problem. - Howard

This year I'm in PYP5. I'm really happy that I could join Student Council. I enjoyed the time that I was able to work with other students, and I enjoyed working with my teachers. If I am on Student Council again next year, I will be super excited, and I will do my best. - Cynthia

I want to make more classes and more work because I want people around the world to work hard and have a smart life. Also more clubs so that people know more things. - Marcello

I like Student Council because we can communicate what is happening later in the school. - Carol

I loved being in the CAIS student council. I missed being a part of it because of the lockdown. I like being a leader so I can talk about our school council meetings to our class. The problem I would like to fix if I am in student council again next year is being responsible for my behavior and remind my friends also to be responsible. - Hazel

Being a class representative is really fun and exciting, because I like to hear and give suggestions on how to make students happy in school. I also enjoyed announcing the results of our meetings to the whole class. My suggestion is for the school to have more reading time. - Jannie

Yes I enjoyed it because I feel responsible and its nice to tell your classmates about the things that are going on in school. I think that we have to work more on making the school safer, by stopping students running inside the school because they can be very dangerous for the younger students. - Dominic

I liked being on student council. I would like to change how students wash their hands and keep safe distance between us to prevent spreading of the coronavirus. Students need to wash their hands every time they go to the bathroom. - Rachel

I liked being a part of the student council because it was fun and I like to make the school a better place. I would like to make the school better by being a good communicator, help students in need, share my ideas and respect others. - Sophie

I enjoyed being the class representative! I'm glad that my class voted for me and I liked that I got to talk in front of people. Next year, I would make the school better by giving more choices to choose from for indoor recess. - Joseph

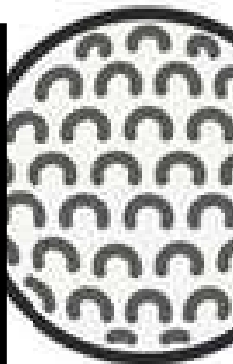

I like to be a member of the student council. I want to make the school better by stop letting some of the people in our school stop saying bad words and I want to help some people that need to help. - Ethan

I enjoyed being in the student council because I can make the school better. If I am in the student council next year I can make the school better by making a better lunch. - Damon

SPORTS DAY

Sports day is when we enjoy sports and games. The most famous game that day was the obstacle race. It was a race with rolling, and jumping and everyone liked it. One thing is that we didn't have this year were house points for the primary level as we felt it would be fun to participate as an entire group than individual houses. This year, sports day was made for kids to have more fun and enjoy the day. Even though we did not have house points, we were still divided into houses. You were either in green, red, blue or orange house and had to wear some form of clothing item with that colour. One aspect we all enjoyed was a new game called "angry birds". Everyone said it was hard, but they all seemed to have fun playing the angry bird game. The aim of the game was to throw a ball and try to make the balloons fall down to the ground. If you got a balloon, you got a point. By the looks of it, everyone was enjoying sports day. After everyone played games, we stood in lines and hi fived each other. This year, we hi fived each other instead of playing tug of war. Everyone said, they loved sports day this year.

Written by: Jenny Joo

INTERNATIONAL

To celebrate our International Day festival, the school held a concert. Mr. Istvan and Ms. Elizabeth were the organizers for this section. Ms. Elizabeth and Mr. Istvan had to organize the order of the performances by time and age so that it would run smoothly. Mr. Istvan needed to ask the students if they wanted to perform as well he had to ask teachers, then he needed to send the message through Managebac. I interviewed Serena from PYP 3 C, who performed. She liked the piano piece that she heard, because it was beautiful. Right before Serena performed, she felt nervous because she thought that she would make some mistakes. After her performance, she felt proud because the group didn't make any mistakes.

PYP YEARBOOK TEAM

This year has been a memorable year for all staff and students at CAIS. This yearbook shows the many wonderful moments students and teachers have enjoyed throughout the whole year, despite the difficult times we faced. We hope you have as much pleasure remembering these happy moments of the 2019-2020 school year as we have had compiling all these memories for you.

We wish all students and staff the best for 2020-2021 school year.

Miss Christine and Miss Sarah
